MAYERS

FINE FOOD

CONNECTING PEOPLE OF TASTE

PRODUCT CATALOGUE | ISSUE 02

A HUMBLE BEGINNING

Mayers Fine Food was established by Fred Mayer in 1957, working out of a Darling Point flat, initially importing Norwegian jumpers and ski wear.

Heavy import restrictions at the time limited food imports to just Swiss wafers and Danish and Swiss cheeses.

When these import restrictions were lifted, the company was able to increase the range of imported food products, satisfying the growing demand in Australia for European food delicacies and specialty products.

COMPANY FOUNDER FRED MAYER

SYDNEY WAREHOUSE

MELBOURNE WAREHOUSE

TODAY

Mayers Fine Food in conjunction with the Arla Foods joint venture offers the most extensive range of food delicacies and specialty products from all around the world. This includes one of the most comprehensive range of cheeses from Australia, Europe, UK and Asia Pacific region.

We import over 2000 premium food and beverage products and distribute nationally on a daily basis to supermarkets, wholesalers, hotels, delicatessens, manufacturers, shipping providers and airline caterers. Our product range also includes water and beverages, dry goods, seafood, chocolate and patisserie ingredients, plus much more!

MAYERS

FINE FOOD

A SUSTAINABLE FUTURE

GREEN REFRIGERATION

Mayers refrigeration system uses carbon dioxide as the primary refrigerant which is highly efficient and a naturally occurring substance that is harmless to the environment. The carbon dioxide system is cooled with two super-efficient micro charged ammonia chillers which ensure optimal operating conditions are maintained all year round.

The defrosting system employs warm glycol as a heating agent which uses heat waste recovered from the refrigeration system. This type of system uses almost no energy and delivers an extremely dry environment inside the cold rooms. This greatly reduces after defrost heat loads, which in turn reduces compressor run time.

The freezer sub floor uses a brand new Australian patent to harvest low-intensity heat recovered from the liquid CO₂ used to warm propylene glycol. It is pumped at a slow speed through a network of specially designed Nylon tubes

built into the concrete in the cold rooms' sub floors. This patent is actually a world first as it provides the first sub floor heating system that increases the energy efficiency of the refrigeration plant. By sub cooling the liquid refrigerant, it reduces the cooling systems power consumption.

Our site is regarded as the most advanced refrigeration plant for storage and distribution of food products in the Southern Hemisphere.

SOLAR POWER

Our warehouse has a 99kw Solar system which covers approximately 10% of our annual energy requirement. We are offsetting approximately 100 tonnes of CO₂ per year by producing power through solar energy which is green, clean and renewable. We are currently in the process of expanding our solar program to cover 30 to 40% of our power demand.

FROM OUR PARTNERS...

OUR CLIMATE AMBITION

Our planet is facing a climate challenge.

Farming and dairy carry a responsibility, but also a great opportunity to contribute positively and help solve that challenge. At Arla, we want to be part of the solution.

We want to reduce Arla's total CO2 emissions by 30 per cent per kilo of milk by 2030 and work towards carbon net zero by 2050.

As the leading international dairy cooperative owned by 10,300 farmers, we are committed to accelerating the transition to sustainable dairy production with intensified focus on the farms. Our excellent and progressive farmers have done a lot so far. CO2 per kilo of Arla milk is already less than half the global average, but our ambitions are even higher.

Across the world, dairy is enjoyed by consumers and dairy plays an important role in providing healthy and sustainable nourishment to a growing world population – now and in the future.

THE GOOD VANILLA

Heilala Vanilla's origins began in 2002 as an aid project founded

New Zealander, John Ross, and his family. The Kingdom of Tonga had been ravaged by Cyclone Waka, leaving the Islands and its people shattered in the wake of an exceptionally vicious natural disaster.

Partnering with a local family in the village of Utungake, together they established a small vanilla plantation that grew into Heilala Vanilla.

Grown on rich, Pacific soil and dried under the Polynesian sun, the world's best vanilla is an all-natural product of a perfect climate. With a highly-scientific, unrefined process, and an artisan work culture of the hard-working local farmers and families, Heilala Vanilla is innovating vanilla products and production. Their farmers are dedicated, tending to each plant with in-depth wisdom and expertise.

From its distinctive flavor, its humanitarian mission and fair treatment of farmers, Heilala Vanilla makes people feel as good as the product tastes.

Heilala Vanilla is authentic Bourbon Vanilla. Complex, rich, and bursting with flavour.

NOW AND FOR GENERATIONS TO COME

FrieslandCampina is working on the retention of pasture grazing, continuous improvement of animal health and animal welfare, and the preservation of biodiversity. The aim is to reduce the use of scarce natural resources such as water, raw materials and fossil fuels.

FrieslandCampina aims to keep the emission of greenhouse gases in 2020 equal to 2010 levels. This also applies in case of an increase in milk production. This includes the greenhouse gases

released at member dairy farms, during transport from the farm to production facilities and when the dairy is processed. To achieve climate-neutral growth, FrieslandCampina is working on creating an efficient and sustainable production chain.

CLIMATE-NEUTRAL GROWTH

In order to realise climate-neutral growth, FrieslandCampina is working on several initiatives for an efficient and sustainable production chain. This means sustainable dairy farms, purchasing sustainable (agricultural) basic materials and reduction of the use of energy for the production of dairy products.

Besides, FrieslandCampina encourages member dairy farmers to generate sustainable energy, for example by means of wind turbines, solar panels or biomass, by issuing green certificates.

ON OUR WAY TO CARBON NEUTRAL CHOCOLATES

OUR GOAL

The reality of climate change – deforestation, carbon emissions – is a real threat to the cocoa ecosystem, the lives of farmers and, ultimately, the taste

of cacao. The only way to overcome it is to let nature do what it has been doing for millions of years: thrive. A difficult challenge for humanity, which must work to limit its impact in order to allow nature to flourish. By doing so, we will offer the world quality chocolates that will not damage, but will help us maintain a liveable planet for generations to come.

HOW TO BECOME DEFORESTATION FREE AND CARBON NEUTRAL?

Therefore, our objective is to make West-African farmers become the solution by initiating on-farm interventions and optimization programs that sequester carbon in soil and plants while improving the natural development of the taste of the cocoa we love so much:

- Distribution and planting of cocoa and non-cocoa trees to restore farms
- Farmer awareness raising sessions on environmental protection
- GPS farm mapping to ensure cocoa is not being sourced from forest land
- Distribution of cleaner energy cookstoves in farmer homes
